- The applicant is hereby notified that International Preliminary Examining Authority transmits here with the international preliminary examination report and its annexes, if any, established on the international application.
- 2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
- 3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report(but not of any annexes) and will transmit such translation to those Offices.

4. REMINDER

The applicant must enter the national phase before each elected office by performing certain acts (filing translations and paying national fees) within 30 month(s) from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details in the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

D1: "An Extensible and Scalable Content Adaptation Pipeline Architecture to Support Heterogeneous Clients"

The present invention relates to apparatus and method for adapting graphics contents. The apparatus comprise of an environment information managing means and an contents adapting means. The environment information includes user terminal characteristics and graphic presentation preference. The adapting means adapts the contents according to the environment information.

D1, regarded as the closest prior art, shows a contents adaptation architecture to adapt the contents according to a client profile. The client profile has the information of the client device and the client user. The user profile provides information such as the user's access privileges and role.

The claimed apparatus operates with the preference information including geometrical and material characteristic of the graphic objects of the contents, and the number of pictures of animation graphic objects shown for one second, but D1 does not. The invention, as in claims 1-16, is considered to be novel, to involve an inventive step and to be industrially applicable.
